Re: Meyer's Campers Expansion

Good morning Kevin,

As the Meyer's Camper's Project here in Churchville moves closer and closer to completion, I felt it only appropriate that I take the time to write you and express my feelings about the most professional manner in which you and your associates have worked with the Village of Churchville.

From the very onset of this project there has been an atmosphere of cooperation that we in government rarely see in a project of this size. As a result we were able to fast track this project through all of the planning and approval processes.

Your architectural and engineering associates were outstanding in their ability to provide the necessary plans and environmental requirements in an expedited manner which allowed us to schedule the additional meetings required to move this project along smoothly and in a timely fashion.

We appreciate especially your cooperation with our Code Enforcement Department and the manner in which you accepted and complied with their suggestions and requirements. I know that they have enjoyed working with you and your associates.

It is our hope that this project will become an example of how local government and those interested in development in our community can work together for the common good. We sincerely hope to be able to work with Sickles Corp again in the near future.

Cordially,

Don Suter  
Village Trustee/ Planning Board Liaison
